

필 Member 4 — T-04 Billing & Payment

Send them:

Your task is T-04 – Billing & Payment.

Run:

```
git clone https://github.com/NushratShanu/HMS-TeamG6.git
```

```
cd HMS-TeamG6
```

```
git checkout dev
```

```
git pull origin dev
```

```
git checkout -b feature/T-04
```

Open PROJECT_FEATURES.md and add:

```
## T-04: Billing & Payment
```

Description:

This feature manages patient billing and payment information.

Functional Requirements:

- The system shall generate patient bills.
- The system shall record payment information.
- The system shall allow users to view billing history.
- The system shall generate billing reports.

Status: Implemented

Then:

```
git add PROJECT_FEATURES.md
```

```
git commit -m "feat: implement billing and payment (T-04)"
```

```
git push -u origin feature/T-04
```

Create the PR:

Base: dev

Compare: feature/T-04

Title:

feat: implement billing and payment (T-04)

Don't merge it. Get another member to review it first.

These requirements match your SRS's billing module, including generating bills, recording payments, viewing billing history, and billing/treatment reports.
